ALTRA 68

FROM RAW MATERIAL TO END PRODUCT

A CLEAR EYE FOR DESIGN & QUALITY

NEW - ALTRA COMPOSITE

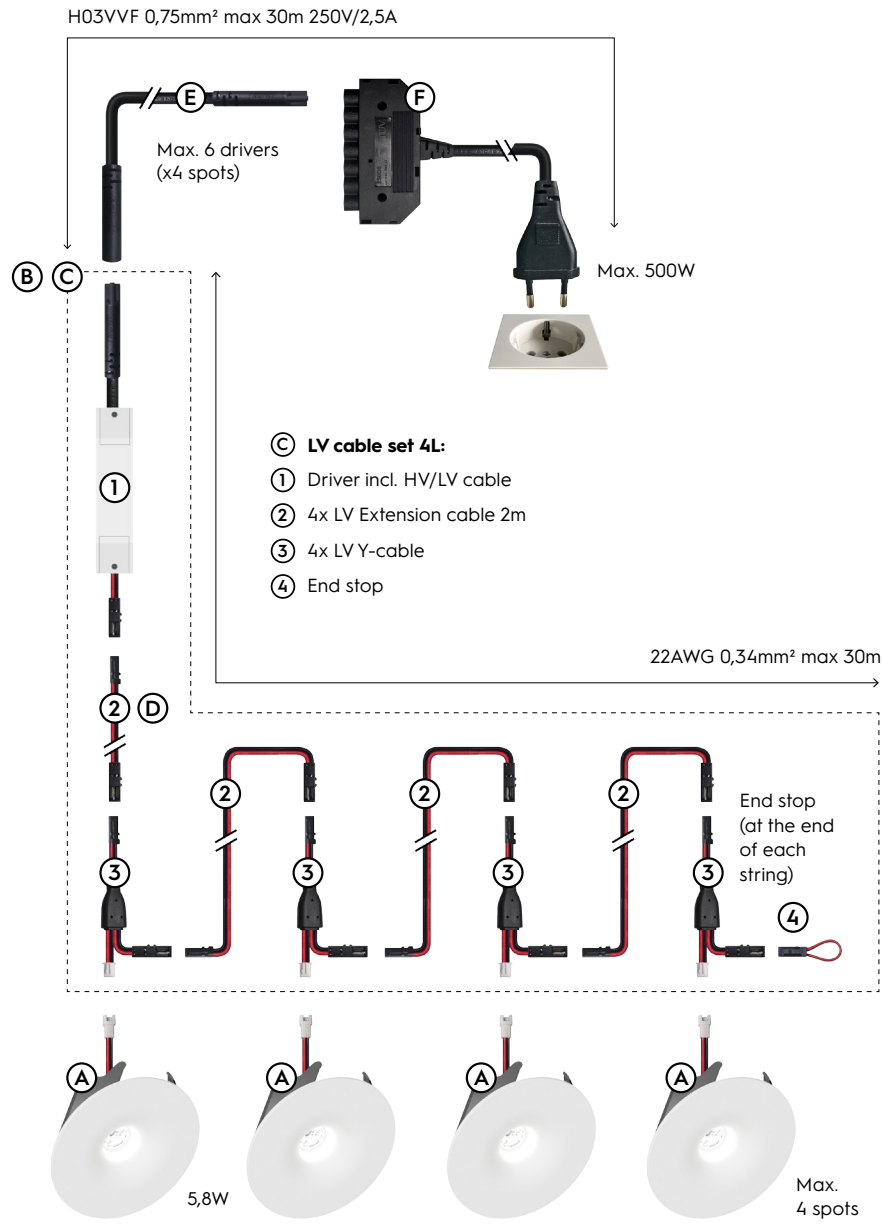

Eyeleds and a local automotive factory have entered into an exclusive collaboration to create a new advanced automatic production line for recessed spotlights. The previous Philips factory is now an important player in the LED automotive market and exports a significant part of its turnover to Chinese car manufacturers. Eyeleds has a lot of experience in developing LED recessed spotlights and is a reliable partner in the lighting market.

This partnership is a game-changer for customers who previously purchased directly from China. With increasing environmental regulations and political tensions, the need for local production has never been more critical. The new project offers an attractive price point while delivering quality and reliability. All products are manufactured from raw materials to finished goods.

Altra 68
black

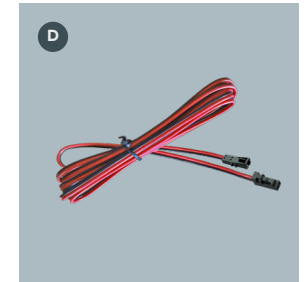

PSU 7W No dim
+ LV cable 0,15m

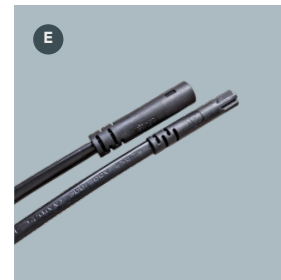

PSU 36W No dim
PSU 40W Triac
PSU 36W Casambi

PSU 36W DALI
+ GST18 5P 0,3m

LV Extension cable 10m
(remote PSU)

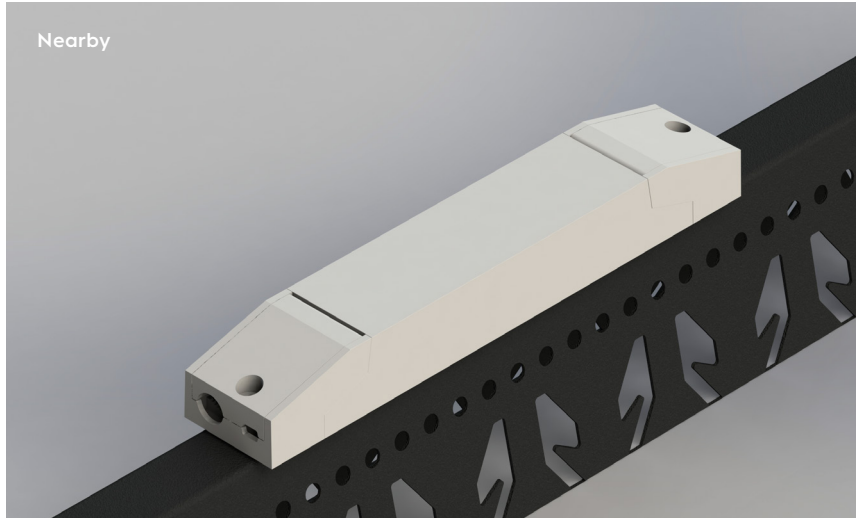

HV Extension cable 2m
(between driver and 6-way distributor)

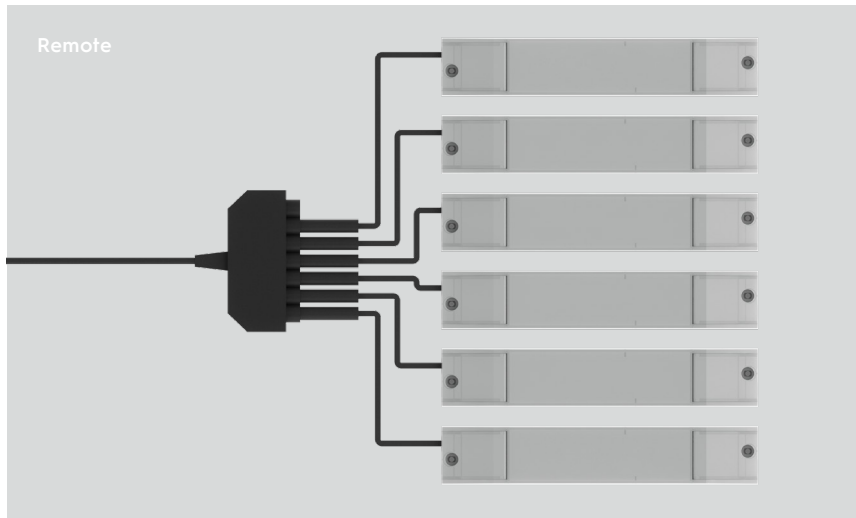

HV Distributor 6x
+ Europlug

HV Distributor 6x
+ GST18 3P

The drivers are provided with 2 pcs of double-sided tape for attachment to the cross rail. Due to the difficult accessibility of the power supply, we recommend using a mains filter to increase the lifespan of the power supply

It is recommended to install the power supplies in an easily accessible place. By using the LV extension cable, the distance to the last spot can be increased to a maximum of 30 meters.

About us

EYELEDS

The history of Eyeleds goes back to 2004, where a collection of narrow floor spotlights was developed and quickly grew into a global sales network in 43 countries. Now after 20 years, this brand is still known among leading architects and lighting designers. A group of professionals revived the brand in 2024 with a series of innovative products that are produced fully automatically from raw material to end product in the Netherlands.

Eyeleds products are primarily aimed at the Western European lighting market, where environmental standards increasingly require products to be produced close to home. The production location meets the highest standards and the products are ENEC approved and provided with EPD certificates. The collection has been supplemented with a number of standard products so that a total solution can be provided for the customer.

**MADE IN
